

Muhammad Aiman Bin Zaizilan

Current location: Bandar Baru Bangi Selangor, Malaysia
E-mail: aimanzaizilan@gmail.com § Phone: +6017-7056895

CAREER OBJECTIVE

A committed and enthusiastic Computer Science student (Data Science) having a confirmed academic record and practical leadership experience. Looking for a full time job to put the technical knowledge and problem-solving skills in practice to real-world projects, get involved with a dynamic team and improve professional skills in a work environment.

WORK EXPERIENCE

FullStack Developer | Telekom Malaysia (*protégé*)
Team: Tech Architecture & Delivery

(Aug 2026 — Current)

- **Full-Stack Development (GTM):** Built the end-to-end "Product Pricing" module using Laravel and Angular, covering migrations, models, APIs, and UI components.
- **Storage & File System Debugging (GTM):** Fixed file-preview and thumbnail-rendering issues by resolving signed URL generation and storage routing bugs.
- **Dashboard Data Integrity (GTM):** Diagnosed and corrected backend data-mapping logic to restore accurate chart visualizations on analytics dashboards.
- **Dynamic QR & PDF Services (EMS-1):** Built automated QR code and PDF generation features across Quizzes, Surveys, and paired Pre/Post Tests using Laravel and Blade.
- **Access Control & Check-in Fixes (EMS-1):** Resolved session authorization restrictions to enable attendee self check-in while maintaining strict admin role gating.
- **Version Control & Quality:** Managed feature branches, resolved merge conflicts, and conducted end-to-end testing following team Git workflows.

Quality Analyst | Weride Malaysia SDN BHD
Team: IT Department

(Mar 2026 — Jul 2026)

- **System Quality Control:** Assist in executing manual and functional testing on applications, systems, and platforms to ensure all deliverables align with business requirements.
- **Data Validation & Integrity:** Perform data validation and verification checks across internal platforms to guarantee accuracy, completeness, and consistency of backend system outputs.
- **Bug Lifecycle Management:** Identify, document, and report application bugs, errors, and inconsistencies in a clear, structured manner to support the development team in timely resolutions.
- **Cross-Team Collaboration:** Work closely with developers and operations teams to replicate system errors, clarify requirements, and support overall platform performance improvements.
- **QA Tool Adherence:** Utilize newly introduced QA tools and technologies to review system logs, audit interface outputs, and maintain data pipeline quality standards.
- **Operational Support:** Complete ad-hoc testing scenarios and technical tasks assigned by supervisors to ensure software reliability ahead of product releases.

EDUCATIONAL BACKGROUND

Bachelor of Computer Science with Honours | Universiti Teknologi MARA (*Shah Alam*)
(Dean List Semester 5: 3.5)

(Sept 2023 — Aug 2026)

Diploma in Applied Science | Universiti Teknologi Mara (*Samarahan 2*)

(May 2020 — May 2023)

SKILLS AND STRENGTHS

- Experience in using **Python, Java scripts, PHP, HTML, MySQL, CSS, Power BI, MongoDB.**
- Proficient in **Microsoft Outlook, Word, Excel, and PowerPoint.**
- Good command of **English** in both **spoken** and **written**
- Experience in using **Selenium** and **JIRA.**
- **Seventh Place** (Top Coders Coding Challenge)
- **Full Scholarship** (TPASBB).

PROJECTS AND EXTRACURRICULAR

ACADEMIC PROJECTS:

- **Temporal Dengue Prediction System Using Machine Learning**
 - Developed a web based using python, Random Forest, Flask and the OpenWeatherMap API forecast dengue risk levels based on Climate Data.
- **Software Engineer Salary Prediction System**
 - Build using python, Streamlit, Flask, and SQL to predict graduate salaries based on qualification inputs, using real vacancy datasets.
- **Web Application Development Project: Restaurant Reservation System**
 - Group Project that developed a library management system using, PHP, HTML, CSS and JavaScript.
 - Designed and prototyped the backend of the system using PHP for connection and handling the databases.
- **Global Superstore Sales Analysis Dashboard**
 - Cleaned and processed sales data using Excel and MySQL (LOAD DATA INFILE), then wrote SQL queries to analyse sales, profit, and customer trends, visualized through an interactive Power BI dashboard connected via MySQL Connector/NET.

EXTRACURRICULAR ACTIVITIES

- **Khazanah Development Program** (October 2022)
Focusing on enhancing communication skills for the workplace.
- **Group Leader** (October 2022)
SULAM Program UiTM Samarahan Sarawak
- **IPv6 Network Engineering Certification** (October 2025)
Credential ID: 20002129-26
- **Rugby UiTM (FSKM)** (June 2025)
Competition between UiTM faculty
